Assignment 7

The purpose of assignment 7 is to present the results of your final project orally in class. You should prepare your oral summary report following the outline that we discussed in class and that is presented in chapter 12 of the textbook. You should do the following:

1. You must prepare your presentation using Power Point slides. The presentations are scheduled to be presented during the two weeks of May 1 and May 8. Thus, we will have 4 class periods for the presentations, with 3 presentations per period. This will be approximately 20 to 25 minutes per presentation.
2. I will gather preferences of when you want to present your final project via email. Please email me within the next week. You must tell me any particular constraints that you face at that time. Should any particular day be over-booked (a likelihood), I will randomly assign times for those students.
3. Students will be required to attend the presentations of other students in the class. Twenty percent of your grade in the class will depend upon both your attendance and your participation in providing feedback to your fellow students. I will also invite other faculty members to attend during these time periods and ask questions and provide feedback. You will be graded both on the content of your presentation as well as your delivery.
4. Follow the procedure discussed in class to do the oral presentation of your final project. Chapter 12 has some good points to make about making such presentations. The presentation should summarize your final project and tell a story about what you found.

The Assignment is due in class, on one of 4 class periods during the weeks of May 1 and May 8.
