

# Book Builder

<http://bookbuilder.cast.org/>

1. Login—I set up my own account where I could build books for students to read. I also set up a second account that students can log into.
2. In the middle column (Create and Share) click on “Create and edit my books”

6. Once you have done all of this, click submit button at the bottom of the screen.
7. You can edit book information at a later time if necessary
8. Now you are ready to select your title page

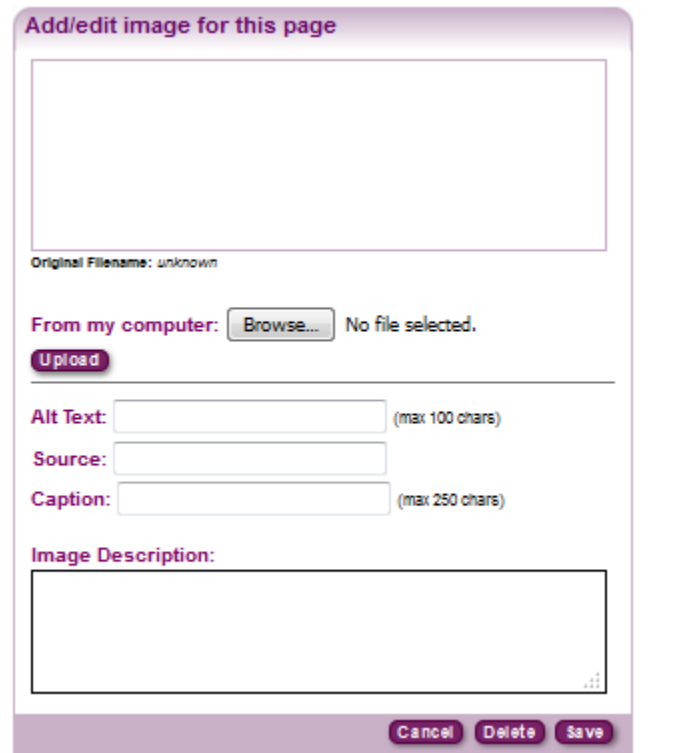

9. Design and type your title page: I usually have students put the name of their book, a picture they have drawn, and their name (s). Each page is lined out with boxes that the information will appear in. To add text/pictures, click the box at the side of the space you want to change. Another popup window will appear which allows you to enter text.

10. Enter your text and then click save.

11. To add photo: click on “add/edit image”
- Picture must be saved to computer
  - click on browse and locate file, double click on file
  - screen will return to the bookbuilder screen, then click upload and wait for picture to appear in the space. Add your source information and click save.

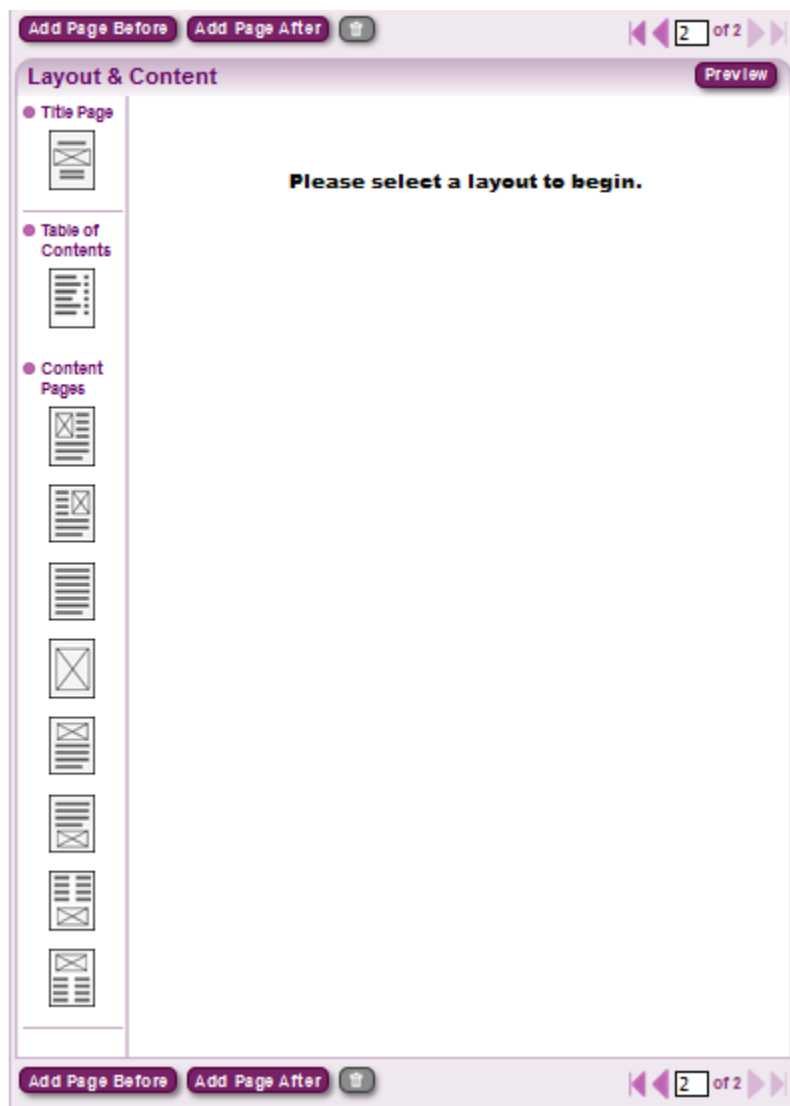

- d. You can use original drawings by having them draw them. We then use a camera to transfer them to computer. You can also have them search for and save pictures from the computer.

12. Just continue entering until the information you are requiring from the students is entered.

13. When done with title page, click “add page after” at the bottom of the screen.

14. When the program goes to the next page, it will be blank, students will need to choose a layout for the new page. From here the process is the same with each page. Just fill in the information, as we did on the title page. To delete a page, click the trashcan at the bottom of the page.

15. To add coach you will work with the bottom part of the page.

The image shows a vertical list of four items under the heading "Coaches". The first three items are coaches, each consisting of a rectangular placeholder box with the text "Click Add/Edit" inside, and a small "Add/Edit" button to its right. The buttons have a purple background and white text. To the right of each button is a small cartoon character icon: a blue penguin, a green alien, and a yellow dog. The fourth item is a "Student Response Area", which also has a placeholder box with "Click Add/Edit" and an "Add/Edit" button to its right.

As with text and pictures, just click “add/edit” button to the side of the coach you want to add. This uses text-to-speech technology, so just type what you want the coach to say and the click save. When a reader clicks on the coach, it will give them something else to think about, or a question to think about and answer.

The image shows a dialog box titled "Add/Edit Coach" with a "Close Window" button in the top right corner. The main text reads: "Coaches are used to provide the reader with supports to help them become strategic and to stay engaged with learning. You can decide how you want the coaches to help, what to name them, and what kind of support they should offer. It helps to create one consistent role for each coach. The coach will read whatever you type."

The image shows a dialog box titled "Add/Edit Coach Speech" with a penguin icon in the top left corner. It contains a large empty text area for entering speech. At the bottom, there are four buttons: "Preview", "Cancel", "Delete", and "Save".

16. To have students read their book, you will need to record them reading each page, and save to the computer using any recording program (such as audacity). You will then upload each audio track from your computer to bookbuilder as you do pictures. The section for doing this is in the middle of the page.

Continue adding pages until book is done. When done—click on “book completed” at bottom of page, then “save.” Your book will show up on your list and is ready to read, download and/or or print.
