Key Ideas and Details

1. Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text.
   a. Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.

2. Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.
   a. Recount stories, including fables, folktales, and myths from diverse cultures; determine the central message, lesson, or moral and explain how it is conveyed through key details in the text.
   b. Determine the main idea of a text; recount the key details and explain how they support the main idea.

3. Analyze how and why individuals, events, and ideas develop and interact over the course of a text.
   a. Describe characters in a story (traits, motivations, feelings) and explain how their actions contribute to the sequence of events.
   b. Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.

Craft and Structure

4. Interpret words and phrases as they are used in a text, including determining technical, connotative, and figurative meanings, and analyze how specific word choices shape meaning or tone.
   a. Determine the meaning of words and phrases as they are used in a text, distinguishing literal from nonliteral language.
   b. Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.

5. Analyze the structure of texts, including how specific sentences, paragraphs, and larger portions of the text (e.g., a section, chapter, scene, or stanza) relate to each other and the whole.
   a. Refer to parts of stories, dramas, and poems when writing or speaking about a text, using terms such as chapter, scene, and stanza; describe how each successive part builds on earlier sections.
   b. Use text features and search tools (key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.

6. Assess how point of view or purpose shapes the content and style of a text.
   a. Distinguish their own point of view from that of the narrator or those of the characters.
   b. Distinguish their own point of view from that of the author of a text.
Integration of Knowledge and Ideas
7. Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
   a. Explain how specific aspects of a text’s illustrations contribute to what is conveyed by the words in a story (create mood, emphasize aspects of a character or setting).
   b. Use information gained from illustrations (maps, photographs) and the words in a text to demonstrate understanding of text (where, when, why, and how key events occur).
8. Delineate and evaluate the argument and specific claims in a text, including the validity of the reasoning as well as the relevance and sufficiency of the evidence.
   a. Not evaluated at third grade for literature
   b. Describe the logical connection between particular sentences and paragraphs in text (comparison, cause/effect, first/second/third in a sequence)
9. Analyze how two or more texts address similar themes or topics in order to build knowledge or to compare the approaches the authors take.
   a. Compare and contrast the themes, settings, and plots of stories written by the same author about the same or similar characters (in books from a series)
   b. Compare and contrast the most important points and key details presented in two texts on the same topic.

Range of Reading and Level of Text Complexity
10. Read and comprehend complex literary and informational texts independently and proficiently.
   a. By the end of the year, read and comprehend literature, including stories, dramas, and poetry, at the high end of the grades 2-3 text complexity band independently and proficiently.
   b. By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2-3 text complexity band independently and proficiently.

Reading Standards: Foundational Skills—Third Grade
Standards 1-2 are Kindergarten/First Grade skills

Phonics and Word Recognition
3. Know and apply grade-level phonics and word analysis skills in decoding words.
   a. Identify and know the meaning of the most common prefixes and derivational suffixes.
   b. Decode words with common Latin suffixes.
   c. Decode multisyllable words.
   d. Read grade-appropriate irregularly spelled words.

Fluency
4. Read with sufficient accuracy and fluency to support comprehension.
   a. Read on-level text with purpose and understanding.
   b. Read on-level prose and poetry orally with accuracy, appropriate rate, and expression on successive readings
   c. Use context to confirm or self-correct word recognition and understanding, rereading as necessary.
College and Career Readiness Anchor Standards for Writing

Text Types and Purposes

1. Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. Write opinion pieces on topics or texts, supporting a point of view with reasons.
   a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons.
   b. Provide reasons that support the opinion.
   c. Use linking words and phrases (e.g., because, therefore, since, for example) to connect opinion and reasons.
   d. Provide a concluding statement or section.

2. Write informative/explanatory texts to examine and convey complex ideas and information clearly and accurately through the effective selection, organization, and analysis of content. Write informative/explanatory texts to examine a topic and convey ideas clearly.
   a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension.
   b. Develop the topic with facts, definitions, and details.
   c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information.
   d. Provide a concluding statement or section.

3. Write narratives to develop real or imagined experiences or events using effective technique, well-chosen details, and well-structured event sequences. Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.
   a. Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally.
   b. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations.
   c. Use temporal words and phrases to signal event order.
   d. Provide a sense of closure.

Production and Distribution of Writing

4. Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
   a. With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose.

5. Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
   a. With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing.

6. Use technology, including the Internet, to produce and publish writing and to interact and collaborate with others.
   a. With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.
Research to Build and Present Knowledge

7. Conduct short as well as more sustained research projects based on focused questions, demonstrating understanding of the subject under investigation.
   a. Conduct short research projects that build knowledge about a topic.

8. Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.
   a. Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories.

9. Draw evidence from literary or informational texts to support analysis, reflection, and research.
   Not assessed in third grade

Range of Writing

10. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.
   a. Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

College and Career Readiness Anchor Standards for Speaking and Listening

Comprehension and Collaboration

1. Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others’ ideas and expressing their own clearly and persuasively.
   a. Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher led) with diverse partners on grade 3 topics and texts, building on others’ ideas and expressing their own clearly.
      i. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion.
      ii. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).
      iii. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others.
      iv. Explain their own ideas and understanding in light of the discussion.

2. Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
   a. Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.

3. Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric.
   a. Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
Presentation of Knowledge and Ideas
4. Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.
   a. Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.

5. Make strategic use of digital media and visual displays of data to express information and enhance understanding of presentations.
   a. Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details.

6. Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.
   a. Speak in complete sentences when appropriate to task and situation in order to provide requested detail or clarification.

College and Career Readiness Anchor Standards for Language

Conventions of Standard English
1. Demonstrate command of the conventions of standard English grammar and usage when writing or speaking.
   a. standard English grammar and usage when writing or speaking.
      i. Explain the function of nouns, pronouns, verbs, adjectives, and adverbs in general and their functions in particular sentences.
      ii. Form and use regular and irregular plural nouns.
      iii. Use abstract nouns (e.g., childhood).
      iv. Form and use regular and irregular verbs.
      v. Form and use the simple (e.g., I walked; I walk; I will walk) verb tenses.
      vi. Ensure subject-verb and pronoun-antecedent agreement.
      vii. Form and use comparative and superlative adjectives and adverbs, and choose between them depending on what is to be modified.
      viii. Use coordinating and subordinating conjunctions.
      ix. Produce simple, compound, and complex sentences.

2. Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
   a. Demonstrate command of the conventions of standard English capitalization, punctuation, and spelling when writing.
      i. Capitalize appropriate words in titles.
      ii. Use commas in addresses.
      iii. Use commas and quotation marks in dialogue.
      iv. Form and use possessives.
      v. Use conventional spelling for high-frequency and other studied words and for adding suffixes to base words (e.g., sitting, smiled, cries, happiness).
      vi. Use spelling patterns and generalizations (e.g., word families, position-based spellings, syllable patterns, ending rules, meaningful word parts) in writing words.
vii. Consult reference materials, including beginning dictionaries, as needed to check and correct spellings.

Knowledge of Language
3. Apply knowledge of language to understand how language functions in different contexts, to make effective choices for meaning or style, and to comprehend more fully when reading or listening.
   a. Use knowledge of language and its conventions when writing, speaking, reading, or listening.
      i. Choose words and phrases for effect.
      ii. Recognize and observe differences between the conventions of spoken and written standard English.

Vocabulary Acquisition and Use
4. Determine or clarify the meaning of unknown and multiple-meaning words and phrases by using context clues, analyzing meaningful word parts, and consulting general and specialized reference materials, as appropriate.
   a. Determine or clarify the meaning of unknown and multiple-meaning word and phrases based on grade 3 reading and content, choosing flexibly from a range of strategies.
      i. Use sentence-level context as a clue to the meaning of a word or phrase.
      ii. Determine the meaning of the new word formed when a known affix is added to a known word (e.g., agreeable/disagreeable, comfortable/uncomfortable, care/careless, heat/preheat).
      iii. Use a known root word as a clue to the meaning of an unknown word with the same root (e.g., company, companion).
      iv. Use glossaries or beginning dictionaries, both print and digital, to determine or clarify the precise meaning of key words and phrases.

5. Demonstrate understanding of figurative language, word relationships, and nuances in word meanings.
   a. Demonstrate understanding of word relationships and nuances in word meanings.
      i. Distinguish the literal and nonliteral meanings of words and phrases in context (e.g., take steps).
      ii. Identify real-life connections between words and their use (e.g., describe people who are friendly or helpful).
      iii. Distinguish shades of meaning among related words that describe states of mind or degrees of certainty (e.g., knew, believed, suspected, heard, wondered).

6. Acquire and use accurately a range of general academic and domain-specific words and phrases sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when encountering an unknown term important to comprehension or expression.
   a. Acquire and use accurately grade-appropriate conversational, general academic, and domain specific words and phrases, including those that signal spatial and temporal relationships (e.g., After dinner that night we went looking for them).

http://www.corestandards.org/ELA-Literacy
Operations and Algebraic Thinking

1. Represent and solve problems involving multiplication and division.
   a. Interpret products of whole numbers, e.g., interpret $5 \times 7$ as the total number of objects in 5 groups of 7 objects each. For example, describe a context in which a total number of objects can be expressed as $5 \times 7$.

   b. Interpret whole-number quotients of whole numbers, e.g., interpret $56 \div 8$ as the number of objects in each share when 56 objects are partitioned equally into 8 shares, or as a number of shares when 56 objects are partitioned into equal shares of 8 objects each. For example, describe a context in which a number of shares or a number of groups can be expressed as $56 \div 8$.

   c. Use multiplication and division within 100 to solve word problems in situations involving equal groups, arrays, and measurement quantities, e.g., by using drawings and equations with a symbol for the unknown number to represent the problem.

   d. Determine the unknown whole number in a multiplication or division equation relating three whole numbers. For example, determine the unknown number that makes the equation true in each of the equations $8 \times ? = 48$, $5 = _\div 3$, $6 \times 6 = ?$

2. Understand properties of multiplication and the relationship between multiplication and division.
   a. Apply properties of operations as strategies to multiply and divide. Examples: If $6 \times 4 = 24$ is known, then $4 \times 6 = 24$ is also known. (Commutative property of multiplication.) $3 \times 5 \times 2$ can be found by $3 \times 5 = 15$, then $15 \times 2 = 30$, or by $5 \times 2 = 10$, then $3 \times 10 = 30$. (Associative property of multiplication.) Knowing that $8 \times 5 = 40$ and $8 \times 2 = 16$, one can find $8 \times 7$ as $8 \times (5 + 2) = (8 \times 5) + (8 \times 2) = 40 + 16 = 56$. (Distributive property.)

   b. Understand division as an unknown-factor problem. For example, find $32 \div 8$ by finding the number that makes 32 when multiplied by 8.

3. Multiply and divide within 100.
   a. Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$, one knows $40 \div 5 = 8$) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers.

4. Solve problems involving the four operations, and identify and explain patterns in arithmetic.
   a. Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.
b. Identify arithmetic patterns (including patterns in the addition table or multiplication table), and explain them using properties of operations. For example, observe that 4 times a number is always even, and explain why 4 times a number can be decomposed into two equal addends.

Numbers and Operations in Base Ten

5. Use place value understanding and properties of operations to perform multi-digit arithmetic.
   a. Use place value understanding to round whole numbers to the nearest 10 or 100.
   b. Fluently add and subtract within 1000 using strategies and algorithms based on place value, properties of operations, and/or the relationship between addition and subtraction.
   c. Multiply one-digit whole numbers by multiples of 10 in the range 10–90 (e.g., 9 × 80, 5 × 60) using strategies based on place value and properties of operations.

Number and Operations-Fractions

6. Develop understanding of fractions as numbers.
   a. Understand a fraction 1/b as the quantity formed by 1 part when a whole is partitioned into b equal parts; understand a fraction a/b as the quantity formed by a parts of size 1/b.
   b. Understand a fraction as a number on the number line; represent fractions on a number line diagram.
      i. Represent a fraction 1/b on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into b equal parts. Recognize that each part has size 1/b and that the endpoint of the part based at 0 locates the number 1/b on the number line.
      ii. Represent a fraction a/b on a number line diagram by marking off a lengths 1/b from 0. Recognize that the resulting interval has size a/b and that its endpoint locates the number a/b on the number line.
   c. Explain equivalence of fractions in special cases, and compare fractions by reasoning about their size.
      i. Understand two fractions as equivalent (equal) if they are the same size, or the same point on a number line.
      ii. Recognize and generate simple equivalent fractions, e.g., 1/2 = 2/4, 4/6 = 2/3). Explain why the fractions are equivalent, e.g., by using a visual fraction model.
      iii. Express whole numbers as fractions, and recognize fractions that are equivalent to whole numbers. Examples: Express 3 in the form 3 = 3/1; recognize that 6/1 = 6; locate 4/4 and 1 at the same point of a number line diagram.
   iv. Compare two fractions with the same numerator or the same denominator by reasoning about their size. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with the symbols >, =, or <, and justify the conclusions, e.g., by using a visual fraction model.
7. Solve problems involving measurement and estimation of intervals of time, liquid volumes, and masses of objects.
   a. Tell and write time to the nearest minute and measure time intervals in minutes. Solve word problems involving addition and subtraction of time intervals in minutes, e.g., by representing the problem on a number line diagram.
   b. Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem.

8. Represent and interpret data.
   a. Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. For example, draw a bar graph in which each square in the bar graph might represent 5 pets.
   b. Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters.

9. Geometric measurement: understand concepts of area and relate area to multiplication and to addition.
   a. Recognize area as an attribute of plane figures and understand concepts of area measurement.
      i. A square with side length 1 unit, called “a unit square,” is said to have “one square unit” of area, and can be used to measure area.
      ii. A plane figure which can be covered without gaps or overlaps by \(n\) unit squares is said to have an area of \(n\) square units.
   b. Measure areas by counting unit squares (square cm, square m, square in, square ft, and improvised units).
   c. Relate area to the operations of multiplication and addition.
      i. Find the area of a rectangle with whole-number side lengths by tiling it, and show that the area is the same as would be found by multiplying the side lengths.
      ii. Multiply side lengths to find areas of rectangles with whole-number side lengths in the context of solving real world and mathematical problems, and represent whole-number products as rectangular areas in mathematical reasoning.
      iii. Use tiling to show in a concrete case that the area of a rectangle with whole-number side lengths \(a\) and \(b + c\) is the sum of \(a \times b\) and \(a \times c\). Use area models to represent the distributive property in mathematical reasoning.
      iv. Recognize area as additive. Find areas of rectilinear figures by decomposing them into non-overlapping rectangles and adding the areas of the non-overlapping parts, applying this technique to solve real world problems.

10. Geometric measurement: recognize perimeter as an attribute of plane figures and distinguish between linear and area measures.
    a. Solve real world and mathematical problems involving perimeters of polygons, including finding the perimeter given the side lengths, finding an unknown side
length, and exhibiting rectangles with the same perimeter and different areas or with the same area and different perimeters.

**Geometry**

   a. Understand that shapes in different categories (e.g., rhombuses, rectangles, and others) may share attributes (e.g., having four sides), and that the shared attributes can define a larger category (e.g., quadrilaterals). Recognize rhombuses, rectangles, and squares as examples of quadrilaterals, and draw examples of quadrilaterals that do not belong to any of these subcategories.
   b. Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. *For example, partition a shape into 4 parts with equal area, and describe the area of each part as 1/4 of the area of the shape.*

http://www.corestandards.org/Math/Practice
Social Studies: Grade Level Expectations

Economic Concepts and Principals
1. Identify and explain public goods and services
2. Distinguish among natural, capital, and human resources
3. Conduct a cost-benefit analysis
4. Identify the existence of taxes and their purpose

Elements of Geographical Study and Analysis
1. Identify and locate the Mississippi and Missouri Rivers
2. Identify states that border Missouri
3. Describe various ecosystems
4. Describe the impact of communication and technology upon people’s lives
5. Identify examples of different regions
6. Read and construct maps

Missouri, United States, and World History
1. Describe the contributions of Martin Luther King

Principles and processes of governance systems
1. Describe how authoritative decisions are made, enforced and interpreted within the federal government
2. Identify and explain the functions of the three branches of the federal government
3. Analyze peaceful resolution of disputes by courts or other authorities, such as parents, teachers, principals, etc.
4. Identify and explain why cities make laws and ordinances
5. Discuss and apply responsibilities of citizens including respect for the rights of others and treating others fairly
6. State the main purposes of the Declaration of Independence
7. Identify the purpose of the Constitution
8. Explain how the National Anthem symbolizes our nation

Relationships of Individual and Group to institutions and traditions
1. Take part in a constructive process or method for resolving conflicts
2. Compare how people’s needs have been met in different ways in different cultures at various times

Tools of social science inquiry
1. Identify, select, and use a variety of sources and resources

http://dese.mo.gov/divimprove/curriculum/GLE/#SS
